

HITB GSEC SPONSORSHIP KIT 2015 / 2016

[HTTP://GSEC.HITB.ORG/](http://gsec.hitb.org/)

WHAT IS HITB GSEC?

A new single track, three-day security conference limited to **111 attendees**, who **vote on the final agenda** and are **introduced to speakers and each other** based on the votes they cast

Vote.

Talks that have been shortlisted for inclusion by the HITB CFP Review Board will be put up for **voting by registered attendees**.

When a paper reaches 10 votes, it is included into the agenda.

Attend.

Introducing speakers to attendees prior to their talk **allows presenters to fine tune their presentations** to ensure the message they're trying to deliver hits home.

It's pointless showing off 0day exploits and demos if the audience doesn't quite understand the ramifications of why the 'calculator suddenly popping up' is something they should be concerned about.

Network.

HITB GSEC is where attendees not only shape the conference program but more importantly get to **meet and network with speakers and their peers**.

It's where relationships are formed and networks established.

PUTTING THE POWER OF PAPER SELECTION IN THE HANDS OF THE ATTENDEE
